

SELECTAMARKTM

The permanent solution for visible security marking!

Selectamark is the cost-effective way to secure your property. Once an item has been marked with Selectamark it stays marked. And permanent visible marking means a more effective deterrent.

Selectamark can be used with total confidence on a wide range of plastic surfaces such as IT and office equipment. It is equally effective at marking painted surfaces, aluminium, wood and glass.

Items are marked with the lettering of your choice, using any combination of letters and numbers. The mark is unique to you. Individual asset ID numbers can be included – at no extra charge!

SIMPLE TO USE

Selectamark takes only seconds to apply and is completely safe.

Individual disposable stencils are provided by us, punched through with lettering as specified by you. Letters are normally dot-matrix (see Fig 1) and from 4mm to 7mm in height. (Stencil type lettering and large sizes by special order). Each stencil can contain 1 or 2 lines, each line with up to 20 letters/numbers.

Stencils are supplied together with our unique blue Marking Compound (or white for marking black items). Simply stick the adhesive stencil to the item you wish to mark and apply the compound through the punched holes (see Fig 2). Within a minute the compound permeates into the surface. The stencil is then removed and discarded, leaving a neat visible and permanent unique identification mark (see Figs 3 & 4).

COST-EFFECTIVE

You have invested thousands of dollars in your IT, office and audio-visual equipment. For just a few dollars more you can protect this major investment from potential theft by using the Selectamark system – a cost effective and proven crime prevention measure. Permanently marked items are of no value to a thief and in fact pose a real risk for a thief to handle.

USERS

Worldwide, thousands of schools, hospitals, government departments and companies large and small have found value in using our system. In Hong Kong users include hundreds of the best schools and universities, technologically advanced hospitals and prudent private companies and public corporations. It is also the permanent marking system of choice for many Hong Kong Government departments.
